

Experiment 11

Demonstrate Infrastructure as a Service (IaaS) by creating a resources group using a Public Cloud Service Provider (Azure), configure with minimum CPU, RAM, and Storage.

Step 1:Go to resource group

Step 2-Create resource group

Step 3-Give necessary things for resource group

The screenshot shows the 'Create a resource group' page in the Microsoft Azure portal. The 'Tags' tab is selected, showing a table for adding tags. The table has three columns: 'Name', 'Value', and 'Resource'. Two tags are already added: 'scree' with value '5' and 'shot' with value '10', both for 'Resource group'. There are empty input fields for adding more tags. At the bottom, there are buttons for 'Review + create', '< Previous', and 'Next : Review + create >'. The Windows taskbar at the bottom shows the date and time as 10:30 AM on 18-10-2023.

Name	Value	Resource
scree	5	Resource group
shot	10	Resource group
		Resource group

Step 4-Resource group created

The screenshot shows the 'Create a resource group' page in the Microsoft Azure portal, now at the 'Review + create' tab. A green message box at the top indicates 'Validation passed.'. The 'Review + create' tab is selected, showing a summary of the resource group configuration. The 'Basics' section shows the subscription as 'Azure for Students', the resource group as 'rishitha', and the region as 'South India'. The 'Tags' section shows the same two tags: 'scree' with value '5' and 'shot' with value '10'. At the bottom, there are buttons for 'Create', '< Previous', and 'Next >', along with a link to 'Download a template for automation'. The Windows taskbar at the bottom shows the date and time as 10:31 AM on 18-10-2023.

Validation passed.

Basics	Tags
Subscription	Azure for Students
Resource group	rishitha
